

One horizontally and two vertically mounted rotating brushes assure an easy cleaning of boot soles and legs.

The brushes are activated by a contact on the handhold and the cleanser is added through an adjustable pump.

Cleaning the machine is simple, because all brushes can be removed without using tools.

The boot cleaner is wired ready for connexion. A seal and gasket kit and the siphon are not included in the delivery.

Boot cleaner

- Mechanical cleaning of boot soles and legs
- Integrated dosage pump for cleaning agent
- Stainless steel 1.4301

Technical Specifications:
