

The pass-through sole cleaner DLSO is designed for an optimal cleaning of shoe soles, achieving a high degree of safety by hygienically restricted guidance of personnel.

Two horizontally mounted rotating brushes, covered by a floor grating made of stainless steel, assure a fast cleaning of the soles. The surfaces are precision-grinded and a solid and functional construction allows a quick and efficient cleaning of soles, with a minimized expenditure of time and effort. The machine is wired ready for connexion.

A seal and gasket kit and small parts are not included in the delivery.

Pass-through sole cleaner

- Cleaning of clog and boot soles
- Simple cleaning of the unit
