

The DSC is a combination for both, sole and boot cleaning. By entering the unit through two different entries either the the boot legs or soles are cleaned.

The machine is especially designed, allowing a high number of persons to enter or exit rooms quickly. The two handholds guarantee a safe and firm stand, while passing through the machine. The machine is wired ready for connexion.

A seal and gasket kit and small parts are not included in the delivery.

Cleaning combination

- Combination of boot and sole cleaning
- Safe restricted guidance of personnel
- Integrated dosage pump for cleaning agent
- available with 4 different brush length
- Stainless steel 1.4301
